

fast_deconv::core::
determine_policy_mdspan

```
graph LR; A[fast_deconv::core::determine_policy_mdspan] --> B[fast_deconv::core::inner_unit_stride]; A --> C[fast_deconv::core::is_aligned_for_vec]; A --> D[fast_deconv::core::rows_aligned_for_vec];
```

A diagram illustrating a function call. A central box on the left, labeled 'fast_deconv::core::determine_policy_mdspan', has three blue arrows pointing to three separate boxes on the right. The top box is labeled 'fast_deconv::core::inner_unit_stride', the middle box is labeled 'fast_deconv::core::is_aligned_for_vec', and the bottom box is labeled 'fast_deconv::core::rows_aligned_for_vec'.
